RE: General and Safety Reference Letter for Calvac Paving

To Whom It May Concern,

I am writing this reference letter in regards to Calvac Paving. Cornerstone Environmental Contractors, Inc. has worked with Calvac Paving for approximately 10 years. Based on their performance, quality, reliability and price, Cornerstone has used them exclusively for paving in the San Francisco Bay area during this time.

Most of our clients have extensive safety requirements and Calvac has always done whatever it takes to be in compliance with them. At times this has been extremely demanding, but they have worked through these requirements with us without complaint. This has included preparation and submittal of pre-construction documentation and having their personnel complete any required client specific training.

Over the past ten years, Calvac has always been responsive to our needs and they have never had an OSHA recordable incident on any of our projects. I would highly recommend them based on their quality of work, cost effectiveness and safe work practices.

You may contact me at (925) 478-4102 should you have any questions or need any additional information.

Sincerely,
Cornerstone Environmental Contractors, Inc.

Randy L. Fowler
President
